■ COMPANY OVERVIEW

Coventry Group Ltd is an Australian public listed company which was incorporated in 1936. It has been listed on the Australian Stock Exchange since 1966. The group is principally a distributor of industrial products and operates throughout Australia and New Zealand with five businesses which trade as:

Konnect Fastening Systems®

Distribution and marketing of:

- Industrial and construction fasteners including bolts, nuts and screws
- General industrial products.

Artia Cabinet Hardware Systems

Importation, distribution and marketing of hardware components and finished products for cabinet making, joinery and shop fitting.

Cooper Fluid Systems

Design, manufacture, distribution and installation of:

- Lubrication and hydraulic fluid systems
- Hoses and fittings
- Engineering and design of specialised lubrication equipment
- Fluid transfer solutions

Torque Industries ("Torque")

Distributes an extensive range of equipment, accessories and spare parts:

- Hydraulics, pneumatics, gas generation equipment, filtration products, hoses & fittings, vacuum equipment and material handling

Nubco Proprietary Limited ("Nubco")

Distributes an extensive range of equipment, accessories and spare parts:

- Industrial and engineering supplies, fasteners, safety & machinery
- Steel, aluminium and stainless steel products
- Concrete reinforcing
- Hand tools, power tools and workshop equipment
- Other industrial and engineer supply products

■ KONNECT FASTENING SYSTEMS®

As a Division of Coventry Group Ltd, Konnect Fastening Systems® is an industry leader in Industrial & Construction Fastening Systems & Supplies across Australia and New Zealand with a proud history of servicing the mining, construction, petrochemical and manufacturing industries.

Konnect Fastening Systems® has operated in Australia in various forms since 1912 when FJ Sweetman first started trading in Western Australia. By combining the expertise and network of Universal Fasteners, Sweetman Fasteners, Queensland Fasteners and Top End Fasteners in Australia and Hylton Parker Fasteners in New Zealand, Konnect Fastening Systems® has evolved into Australasia's Fastener Specialists.

Konnect Fastening Systems® have an extensive branch network stretching throughout all states and territories in Australia and the North and South islands of New Zealand. With an immense breadth and depth of product as well as ISO9001 Quality Management Systems certification for several of our Australian Distribution Centres, Konnect Fastening Systems® stands out as one of the premier fastener specialists.

Konnect Fastening Systems® places a great emphasis on our ability to deliver:

- Quality Products
- Prompt and Accurate Delivery
- Quality Customer Service
- Technical Assistance
- Specially Manufactured Products

■ CAPABILITY OVERVIEW

As Australia and New Zealand's Fastener Specialists, Konnect Fastening Systems® caters for all major industries and has a comprehensive range of fastener products available in all Australian States and Territories; and New Zealand's North and South Islands.

This is complimented by our ability to access special and custom fasteners through relationships with a diverse range of fastener manufacturers. The following outlines some of the items we offer in major product groups.

INDUSTRIAL FASTENERS	STAINLESS STEEL FASTENERS & HARDWARE	CONSTRUCTION FASTENERS	SPECIALISED FASTENER PRODUCTS & SYSTEMS	ASSOCIATED INDUSTRIAL TOOLS & CONSUMABLES

■ PETROCHEMICAL

Konnect Fastening Systems® has been providing quality studbolt and fastening solutions to the petrochemical market for over 25 years. The experience gained in working with leading global manufacturers has seen us develop a range of products and finishes to meet the most demanding applications.

Our dedicated studbolts facility located in Redcliffe, Western Australia, can offer quick turnaround times due to on site stocks of raw material as well as pre-cut product. Pre-cut product is also available through distribution centres. Significant amounts of precut stock is held in our distribution centres throughout Australia.

Konnect Fastening Systems® studbolts are marked at the time of manufacture to identify them as product and indicate the grade of material. Traceability to raw materials used is maintained throughout the manufacturing process and all products can be supplied with full certification for material composition and mechanical properties. Our standard range includes studbolts made from the following materials:

- B7
- B8
- B8M
- L7
- B16

In addition to the standard range, high integrity fasteners in exotic or super alloy material grades are also available including:

- Duplex & Super Duplex
- Exotic Alloys – Hastelloy, Inconel
- Titanium – Grade 2 & 5
- Heat resistant grades
- Non-ferrous
- Malaysian made studs

■ MAJOR SUPPLIERS

Konnect Fastening Systems® offers a diverse range of premium brands, including our own Konnect Fastening Systems®, and brands.

Konnect Fastening Systems® has developed relationships with a wide range of quality suppliers, a selection of which are featured to the right. Access to these providers allows Konnect Fastening Systems® to offer you a wide variety of quality products in a broad range of fastener and associated categories. Konnect Fastening Systems® are the original authorised distributor for the Nord-Lock bolt securing system in Australasia. In addition to off the shelf products, Konnect Fastening Systems® have relationships with several manufacturing and engineering firms providing access to custom and specialised fasteners on request.

Konnect Fastening Systems® also has our own brand. The Konnect Fastening Systems® offering comprises products including mild steel, high tensile and stainless steel fasteners, threaded rod, rivets, self-drilling screws and structural assemblies. Konnect Fastening Systems® brand offering products are manufactured to relevant Australian or corresponding international standards. Test certificates, mill certificates and letters of compliance are available on request for all Konnect Fastening Systems® high tensile products.

Our locally cut range of studbolts are chamfered and cut at our dedicated studbolts facility in Redcliffe, Western Australia.

MAJOR SUPPLIERS

■ KONNECT FASTENING SYSTEMS® ADVANTAGES

There is a lot more to fasteners than just simple nuts and bolts; the suitability of a fastener is highly dependent on its application.

The selection process must establish the strength required (material grade), corrosion factors (protective coatings), head type and thread form fit. That's why it is important to use a specialist such as Konnect Fastening Systems®. Our extensive industry experience enables us to provide support for all types of fasteners for a wide range of applications. Access to information and our ability to source many different materials and coatings means you be assured that you are receiving comprehensive support made possible by our experience and long standing supply partnerships.

ON SITE SERVICES

Konnect Fastening Systems® can offer fully customised on-site containers that provide an on-site 'warehouse' stocked with a range of products relevant to your business or project. This means stock is on site and ready to go whenever it is required without costly delays. A Konnect Fastening Systems® representative will visit the site at selected intervals to record usage and issue an invoice.

Containers are fitted with appropriate lighting and shelving and can be assembled and stocked ready for transport to site. Due to our large range it can sometimes be difficult to select the appropriate product mix for a site and Konnect Fastening Systems® can also help in this area. We have generic product mixes developed for several major industries including construction, mining projects, infrastructure projects, coal seam gas projects, fabrication workshops and more.

■ THE KONNECT FASTENING SYSTEMS® DIFFERENCE

VENDOR MANAGER INVENTORY (VMI)

In addition to on-site containers, Konnect Fastening Systems® can offer complete customised VMI solutions. Ranging from facilitation of on-site cabinets and tubs of product through to organising products on your workshop shelves, our sales representatives can closely monitor and manage stock levels to your requirements to ensure stock is ordered whenever it's needed. This service gives peace of mind that stock levels will not be compromised, removing the need to worry about delays or downtime.

OTHER ADVANTAGES OF KONNECT FASTENING SYSTEMS®

At Konnect Fastening Systems® we understand that a superior service response is critical in today's business environment. Our aim is to offer customers across Australia and New Zealand the most professional fastener supply service possible. Fasteners often comprise only a small but important component of our customers' requirements so we strive to keep the process of order and supply as simple as possible. For your convenience orders can be placed by phone, fax, online, email, mail or in person. A far reaching branch network and daily multi-delivery agreement with our logistics suppliers gives us the ability to meet a range of stringent supply requirement.

NEW ZEALAND INTERNATIONAL CONVENTION CENTRE (NZICC) – Auckland, New Zealand
Konnect Fastening Systems® supplied all the structural fastenings for the NZICC build.

■ MAJOR INDUSTRIES SERVED

Konnect Fastening Systems® has a proud history of servicing major industry segments including mining, manufacturing, oil and gas, power and energy, rail transport, water infrastructure, construction and transportable home manufacture.

Konnect Fastening Systems® has been involved in numerous major projects across Australia and New Zealand including:

- Gold Coast, New South Wales, Victorian & South Australian Desalination plants
- North South Bypass / Clem Jones Tunnel – QLD
- Yarwun Alumina Refinery Stage 2 (Rio Tinto) – QLD
- Woodside Pluto LNG Plant – WA
- Woodside LNG Train 4 – WA
- Alcan Gove expansion (Rio Tinto) – NT
- Ravensthorpe Nickel Mine – WA
- BHP Worsley Alumina expansion – WA
- ENI Blacktip Gas Project Darwin – NT
- Dampier to Bunbury Natural Gas Pipeline – WA
- Melbourne Rectangular Stadium – VIC
- Eastlink & Citylink projects – VIC
- Domain & Burnley Tunnels – VIC
- MCG & Docklands Stadiums – VIC
- Lane Cove & Cross City Tunnels – NSW
- Air Warfare Destroyer Project – SA
- Port Road Extension / Northern Expressway – SA
- Western Sydney Stadium – NSW
- Waltzing Matilda Centre – Winton – QLD
- Water Treatment Plant - Townsville – QLD
- Lavarack Barracks LAN 17 - Townsville – QLD
- RAAF Control Tower – Townsville – QLD
- Townsville Airport - Townsville – QLD
- Townsville Port, Berth 4 – Townsville – QLD
- Homemaker Centre stage 1 – Townsville – QLD
- Homemaker Centre stage 2 – Townsville – QLD
- Fairfield Shopping Centre – Townsville – QLD
- Willows Shopping Centre – Townsville – QLD
- The Ville Casino – Townsville – QLD
- Mount Emerald Wind Farm – QLD
- Upgrade to the Edmonton Waste Water Treatment Clarifier – QLD
- South of Embley Boyd Project Known as Amrun – QLD
- Optus Stadium – Perth, WA
- New Zealand Convention Centre - AKL
- Commercial Bay - AKL
- Sistema Cladding - AKL
- ANZ South Island Regional Offices - CHCH
- Todd Park Refurbishment - WGTN
- Westfield Newmarket - AKL
- Christchurch Convention Centre - CHCH
- Bunnings Distribution Centre Cladding - AKL
- Toll Holdings Logistics - AKL

■ ELECTRONIC CAPABILITY

Konnect Fastening Systems® utilises the Oracle e-Business Suite throughout its nationally linked computer network. This system enables development of B2B solutions for large account customers as well as online trading capability through our online store.

Our Oracle IT system consists of six integrated applications interacting in unison - Procurement, Order Management, Inventory Management, Finance, Work In Progress & the Discoverer Reporting Tool. This system allows full monitoring and control across all areas of our business and enables full traceability throughout our business processes. All undertakings are fully recorded, which is particularly advantageous for account keeping purposes. We have the ability to email invoices and statements monthly in addition to hard copy versions, allowing customers to electronically monitor and save all accounting information and exchanges.

Konnect Fastening Systems® continually strives to keep up to date with the most modern accounting practices and technologies to enable easy contact and smooth transactions with our customers.

B2B Trading

As part of our continuing effort to ensure transactions with our customers are as fast and hassle free as possible, we have begun to develop solutions enabling direct B2B trading for large account customers. Seamless integration between our Oracle system and customer computer systems is possible via a third party electronic integration partner, allowing simple and efficient ordering with no manual intervention. Full integration is currently provided to customers using Quadrem and Mincom Axis as their trading partners and future integration with other providers is able to be investigated.

OPTUS STADIUM – PERTH, WESTERN AUSTRALIA

65,000 seat multipurpose sporting stadium and entertainment precinct.

■ ISO 9001:2015 – QUALITY MANAGEMENT SYSTEMS

Konnect Fastening Systems® maintains ISO 9001:2015 Quality Management Systems certification for our Redcliffe and Thomastown distribution centres as well as our Redcliffe Studbolt Division.

External auditing is performed by SGS Australia, one of the world's leading certification bodies. This certification means that Konnect Fastening Systems® has been externally validated to:

- Have business processes which are documented and consistently followed
- A system for identification and resolution of non-conformances impacting the customer
- A system to ensure that measures are put in place to prevent the occurrence of non-conformances
- A mechanism to enable continuous improvement related to processes and service to our customers.

BURNLEY TUNNEL VENTILATION STACK – Melbourne, Victoria

Konnect Fastening Systems® provided a range of fasteners to the Burnley Tunnel project.

■ SAFETY

Konnect Fastening Systems® is committed to ensuring that all of its operations and activities are conducted in a manner that does not impact on the health and safety of any person. We consider that there is no more important factor in the undertaking of anyone's job than the prevention of injury or ill-health to any person.

Konnect Fastening Systems® is committed to ensuring a safe and healthy working environment for all staff and contractors at all of its work locations and operations.

The complete elimination of injuries is our ultimate goal. Konnect Fastening Systems® strongly believes that all incidents are preventable and that a 'zero accident' target is achievable.

To achieve these commitments Konnect Fastening Systems®:

- Involves all staff and contractors in health and safety programs and training to actively take steps to control hazards
- Looks to continually improve performance to prevent work – related injury and illness through measurable objectives and targets
- Provides rehabilitation programs for employees in the event of an injury or illness occurring, or in the event of personal or family loss
- Complies with all relevant legislation, regulations and codes of practice and endeavours to exceed compliance
- Ensures that all staff and contractors are aware of the Konnect Fastening Systems® safety policy and procedures and are appropriately trained to undertake their duties and understand their responsibilities in accordance with these policies and procedures
- Integrate and maintains management of health and safety as a central part of Konnect Fastening Systems® safety management system

Commitment to safety is considered a team obligation involving managers, supervisors, sub-contractors, suppliers and employees working together through consultation and co-operation.

■ ENVIRONMENT

Konnect Fastening Systems® is committed to ensuring that all its operations and activities are conducted in a manner that minimises any impact on the environment.

Konnect Fastening Systems® recognises that its operations have an environmental impact and seeks to manage its activities and adopt techniques that minimise environmental harm. Konnect Fastening Systems® also recognises the rights of others in the environment.

To achieve our commitment Konnect Fastening Systems®:

- Minimises adverse environmental impacts through the use of integrated management procedures and planning
- Monitors and reviews its operations to identify opportunities to improve environmental performance
- As a minimum, complies with all relevant legislation, regulations and Code of Practice
- Recognises the responsibilities of all employees, including contractors, to work in an appropriate manner, and provides training and resources to ensure tasks are properly performed
- Minimises the environmental impact of waste disposal by recycling

Commitment to the environment is a team obligation involving co-operation and consultation between Konnect Fastening Systems®, its employees and contractors.

■ TRAINING

Konnect Fastening Systems® is committed to training and developing its staff and has implemented a comprehensive online learning management system (LMS) to deliver and record flexible and competency based training to all its employees.

On commencement with Konnect Fastening Systems®, a detailed induction program consisting of LMS and on the job training is in place for all new staff members. After completion of their induction training, staff members have the opportunity to further develop their skills by undertaking additional LMS training packages.

Staff identified as high performers who are seeking career advancement are invited into Certificate IV and Diploma level training in Frontline Management. Tuition assistance programs are available to staff as a means to assist in attaining further qualifications that will enhance their ability to advance through the business.

An annual performance appraisal process provides an opportunity for all staff to discuss career goals with their managers, identify skills gaps and request approved training. This provides the foundation for internal and external training that occurs throughout the year.

Common training that is offered includes external courses in leadership, sales, customer service, project management, financial management, safety and Microsoft Office. Critically, for Branch staff, regular product knowledge training from both internal and external providers is also undertaken.

■ CODE OF CONDUCT

Konnect Fastening Systems®, a division of the Coventry Group Ltd, has a formal code of conduct.

The code sets out the principles and standards with which all the Group's directors and employees are expected to comply in the performance of their respective duties. The code requires all directors and employees to act with honesty and integrity, comply with the law and conduct themselves in the best interests of the company. The full code of conduct can be viewed on the Coventry Group Ltd website: www.cgl.com.au and the Konnect Fastening Systems® websites as per the footer below.

AUSTRALIAN TECHNOLOGY PARK (ATP) – Sydney, New South Wales
95,000sqm of commercial & retail space, centrally located in the heart of Sydney.

Special thanks to Mirvac for allowing Konnect Fastening Systems® to photograph the construction site. Mirvac will be the developer, builder and a long-term owner of ATP.

■ COVENTRY GROUP LTD – VALUES
